

One page per week. Print, sign, submit.

Each handout maps to a 90-minute Übung session, with rubric-anchored deliverables due Friday 18:00.

THE FIVE LAB SHEETS

W11 Maintenance DoD Check Apply four W11 DoD criteria to a Self-Chosen-Doc from your M7 library. 1 page. Due Fr 18:00	W12 Metric-Choice Memo One metric (from W12), one form (T/D/H/R), one CI implementation, one action. 1 page. Due Fr 18:00	W13 M10 Sprint Review Packet Five-slide draft + self-evaluation Coverage/Freshness/Accountability/Signal. 5 + 1 pages. Due Fr 18:00	W14 FinalPitch 12 min Recorded pitch (Pitch 8 + Q&A 3 + Reflection 1). Plus peer-review artifact. Due Fr 18:00	W15 Reflection Statement 200 words, three prompts (Worked / Didn't / Would-change). Closing ceremony. Sub Fr 18:00
--	--	--	---	---

Format PDF (printable) or hand-written scan. Both count.	Submission LMS upload by Friday 18:00 each week. Late = 0.5x / day.	Grading Pass / Conditional / Fail. Conditional requires one targeted patch.

Maintenance DoD Check — Self-Chosen Doc

Apply the four W11 DoD criteria to one doc-page from your M7 library.

90-MINUTE AGENDA

00–05 min	Setup — choose your doc Pick one self-chosen doc-page from your M7 library. Write name + URL on paper.
05–50 min	Apply four DoD criteria Reader-still-first · Sunset-Header · CI-green · Owner-of-record. One pass per criterion.
50–80 min	Peer cruises—test Exchange doc with neighbour (5 min silent read each). Log one Strength · one Risk.
80–90 min	Submit the DoD-Check Fix one Risk in real-time if possible. Otherwise commit to next-sprint fix with owner.

DELIVERABLE

1 page — Doc name + URL + 4-criterion table + 1 Strength + 1 Risk + Owner. Hand-written scan or PDF.

Due Friday 18:00 via LMS. Late = 0.5× per day.

RUBRIC — 1–5 PER AXIS

Reader-still-first	1 · 5	5: page answers a real reader question today. 1: no reader question visible.
Sunset-Header	1 · 5	5: stage 2 banner present if deprecated, successor link live. 1: silent deprecation.
CI-green	1 · 5	5: vale + lychee + mkdocs strict all pass for this file. 1: any red blocks merge.
Owner-of-record	1 · 5	5: page frontmatter lists team + backup. 1: no owner field at all.
Pass rule	≥ 15/20	no axis < 3. < 12 = fail. 12–14 = conditional (1 patch).

Hinweis. „Reader-still-first” ist die schwierigste Spalte — sie verlangt, dass du behauptest, welche Frage ein Leser heute noch hat. Wenn du keine Antwort hast, ist die Spalte ehrlich eine 1.

Metric-Choice Memo — four fields, one page

One metric. One form. One CI hook. One falsifiable action.

90-MINUTE AGENDA

00–10 min	Pick one metric Cite-rate / time-to-first-PR / vale-density / lychee-rate. Justify in one sentence.
10–40 min	Pick one form & write a CI hook Trend / Distribution / Threshold / Ratio. Concrete CI implementation (yaml, regex, grep).
40–70 min	Pair-test the form-fit Compare with neighbour: does the form answer your claim? Rewrite if not.
70–90 min	Write the falsifiable action Name owner + date + test-of-failure. Same form as W11 ledger.

DELIVERABLE

1 page — Four fields side-by-side: Metric, Form, CI Hook, Action. Hand-written scan or PDF.

Due Friday 18:00 via LMS. Pass rule: all four fields filled + CI hook syntactically valid.

THE FOUR FIELDS — ONE PER QUADRANT

FIELD 01 Metric Which W12 metric. One sentence on why this metric is in your library.	FIELD 02 Form Trend / Distribution / Threshold / Ratio. Justified against your claim.
FIELD 03 CI Hook Or yaml snippet, grep regex, or shell command. Syntactically valid — tested.	FIELD 04 Action Owner + Date + Test-of-Failure. Same form as W11 ledger entry.

Hinweis. Wenn eure CI-Hook nicht syntaktisch läuft (Copy-Paste-Test im Lab), ist Field 03 ehrlich eine 0. Lehrender prüft dies live.

M10 Sprint Review Packet — 5 slots + self-evaluation

Five mandatory slots, each with one DoD criterion. Then rate yourself on the four-axis rubric.

90-MINUTE AGENDA — SPRINT-REVIEW IN REAL-TIME

00–15 min	Slot 01 — Shipped PR-list with metric-tag + owner-of-record. Cite URL.
15–30 min	Slot 02 — Measured Trend-C plot from W12. Axis = release, y = metric. Live render.
30–45 min	Slot 03 — Rotated Owner-of-record ledger update. New-team ack signature.
45–60 min	Slot 04 — Sunset Any stage 2 → 3 or stage 4 → 5 transitions. Successor link live.
60–75 min	Slot 05 — Kept Cite-rate evidence from retro. Durability test.
75–90 min	Self-evaluation · rubric 1–5 Rate Coverage / Freshness / Accountability / Signal. Submit draft.

DELIVERABLE

5 slides + 1 selbstevaluation per axis. PDF. Each slide represents one slot.

Due Friday 18:00 via LMS. Pass rule: ≥ 15/20, no axis < 3.

FIVE SLOTS — WHAT EACH SLIDE MUST CONTAIN

SLOT 01 Shipped <i>What landed?</i>	SLOT 02 Measured <i>What did the number do?</i>	SLOT 03 Rotated <i>Who owns it next quarter?</i>	SLOT 04 Sunset <i>What crossed a stage?</i>	SLOT 05 Kept <i>What survived?</i>
---	---	--	---	--

Hinweis. „Leere Slot“ ist im Lab die größte Falle. Wenn eine Rotation nicht stattgefunden hat, schreibt „no rotation needed“ — Leerstelle zählt als 1/5.

FinalPitch 12 min — record live, peer-review live

12 minutes of pitch. Two peer-reviewers. Three sentences each — Strength · Risk · Ask.

90-MINUTE AGENDA — LIVE RECORDINGS

00–10 min	Setup — Pairs, recorders Pair up. One phone per pair as recorder. Test audio 2 min.
10–25 min	Pitch #1 + reviewer First pair runs 12 minutes. Other pair gives Strength · Risk · Ask.
25–40 min	Pitch #2 + reviewer Swap roles.
40–55 min	Pitch #3 + reviewer Vierte:r Studierende:r (oder eine Wiederholung).
55–80 min	Pitch #4 + reviewer Swap roles.
80–90 min	Submit recording URL Auf LMS hochladen. Pass rule: alle 4 Achsen ≥3, beide 12-min Trennung sauber.

DELIVERABLE

12-min Aufnahme (mp4 oder Link). Plus zwei Strength-/Risk-/Ask-Sätze je Recording.

Due Friday 18:00 via LMS. Pass rule: ≥ 15/20 in Co / Fr / Ac / Si.

THREE BLOCKS — 8 + 3 + 1 MINUTES TOTAL

BLOCK 01 8 min Pitch All 5 W13 slots. Trend-C visible. One decision per minute.	BLOCK 02 3 min Q&A Two peer-reviewers. One Strength-anchored question, one Risk-anchored.	BLOCK 03 1 min Reflection One paragraph naming what would change. Owner + Date.
---	---	---

Hinweis. Der Lauteste im Raum ist nicht der Beste. Eine Aufnahme ist ein objektiver Test — sie spiegelt die Übung 1:1. Wer die Aufnahme scheut, scheut die Disziplin.

Reflection Statement — 200 words, three prompts

Worked / Didn't / Would-change. Plus a four-field commitment that closes the semester.

90-MINUTE AGENDA — THE CLOSING RITUAL

00–05 min	Setup — Stift + Papier SchlieÙe das Laptop. Eine Seite Papier. Stift. Timer 12 min.
05–20 min	Write three prompts Worked (60 W) · Didn't (60 W) · Would-change (60 W). Total ≤ 200 W.
20–40 min	Write the four-field commitment Action, owner, date, test-of-failure. Same form as W11 ledger.
40–60 min	Read aloud Eine:r Studierende:r liest vor. Lehrender moderiert.
60–90 min	Submit · closing ritual Scan / Foto / PDF auf LMS. Closing-Ritual: jeder desk top-class.

DELIVERABLE

200 words reflection + 4 fields commitment. PDF, scan, or hand-written photo.

Due Friday 18:00 via LMS. This is your course-pass artifact.

THREE PROMPTS — ONE PARAGRAPH EACH

PROMPT 01 Worked Name one artefact that a new reader could navigate without asking. Cite IIR! Four-field commitment (closing-ritual) Action Owner Date Test-of-failure If (date) passes without (artefact), I missed.	PROMPT 02 Didn't Cite a W12 metric (cite-rate / time-to-first-PR / vale-density / lychee-rate) that worsened	PROMPT 03 Would-change One falsifiable action. Owner + Date. Same form as W11 ledger entry.
---	---	--

Five hand-ins, three grades, one rubric

Late = 0.5×/day. Pass = all four axes addressed. Fail = rewrite next sprint.

SUBMISSION CALENDAR

Week	Handout	Length · format	Deadline
W11	Maintenance DoD Check	1 page · PDF / hand-scan	Fr 18:00
W12	Metric-Choice Memo	1 page · PDF / hand-scan	Fr 18:00
W13	M10 Sprint Review Packet	5 slides + 1 eval · PDF	Fr 18:00
W14	FinalPitch 12 min	mp4 / link + 2 reviews	Fr 18:00
W15	Reflection Statement	200 words · PDF / scan / photo	Fr 18:00

THREE GRADES — ONE RUBRIC

PASS All four axes addressed Reader-still-first · Sunset-Header · CI-green · Owner-of-record (W11) or equivalent (W12-W15). ≥ 15/20. No axis < 3.	CONDITIONAL One targeted patch One axis < 3. Patch in next sprint with named owner + date. 12 – 14 / 20. Re-submit by next Friday.	FAIL Rewrite + new submission Two or more axes < 3, or axis<sub>A</sub>+axis<sub>B</sub> contradiction. < 12 / 20. Rewrite & resubmit next sprint.
---	--	---

Submission policy

- LMS upload only. Email = not accepted. Cloud links (Drive, Dropbox) need a stable URL.
- Late = 0.5× / day. After 7 days = forfeit. Re-grade possible next submission.
- Format — PDF, scan, hand-written photo, mp4. Plain text / markdown only on W12.
- Plagiarism in the Reflection Statement = fail. The reflection is *yours*.
